PROFESSIONAL EXPERIENCE

Web Developer — Redding Designs, Charlottetown, PE

February 2022 - Present

- Developed and sustained responsive websites and user interfaces utilizing HTML, CSS, Sass, PHP, WordPress, JavaScript frameworks and whatever programming language or tool the project calls for.
- Specialized in front-end development, focusing on creating responsive and user-friendly interfaces using HTML, CSS, JavaScript, jQuery and PHP.
- Utilized Version Control (Git) for efficient management and updates of websites, following agile software development practices to ensure seamless collaboration and iterative progress.
- Oversaw the upkeep and organization of the Charlottetown, PE office space.

- Provided hands-on guidance to clients on navigating and optimizing backend functionalities for various websites.

Freelance Web and Mobile App Developer

January 2023 - Present

- Spearheaded the development of responsive websites and mobile applications for diverse clients.
- Leveraged a tech stack including HTML, CSS, JavaScript, Wordpress, PHP, and Flutter for cross-platform mobile app development.
- Collaborated closely with clients to understand project requirements and ensure successful project delivery.
- Implemented Version Control (Git) for effective project management and version tracking.
- Demonstrated problem-solving skills by efficiently resolving technical challenges during the development process.

Cashier — Sobeys, Charlottetown, PE

September 2019 - February 2022

- Managed cash transactions totaling 10,000 dollars daily, ensuring accurate processing and financial integrity.
- Provided exemplary customer service to over 100 customers daily, addressing inquiries, resolving issues, and handling complaints promptly.
- Contributed to the overall efficiency of store operations by maintaining a high level of customer satisfaction and resolving challenges in a timely and professional manner.

PORTFOLIO

Musical Standoff — *Full-Stack Flutter App with Firebase Integration*

May 2022 – September 2022

Spearheaded the development of a dynamic Flutter application seamlessly integrating with Firebase services. Utilized Firebase to create a robust backend infrastructure. Also implemented real-time data synchronization. You can access the repo [here](#).

Online Portfolio — *Frontend Development with WordPress Integration*

May 2022 – Present

Curated an online portfolio showcasing a collection of websites developed during my current role. Designed for easy navigation, the website provides direct links to various projects, offering a comprehensive overview of my work. Visit my portfolio at <https://demiadisa.github.io/> to explore projects and gain insights into my development expertise.
